SUMMARY

Aspiring Data Analyst with hands-on experience in Python, SQL, Advanced Excel, and Power BI. Currently completing a Data Analyst internship, working on real-world datasets covering data cleaning, exploratory data analysis (EDA), dashboard development, and business reporting. Brings additional exposure to software development and manual testing through a 6-month internship at QSpiders. Seeking an entry-level Data Analyst role to contribute to data-driven decision-making.

Core Competencies: Data Analysis | Data Visualization | SQL | Python | Power BI | Advanced Excel | HTML | CSS | Jira | Automation Testing | Data Cleaning | EDA | Dashboard Development | Business Reporting | Statistical Analysis

TECHNICAL SKILLS

Languages & Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Advanced Excel, HTML, CSS
Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Business Reporting
Visualization & BI: Power BI, Power Query, DAX, Excel Dashboards (Pivot Tables, VLOOKUP, XLOOKUP)
Databases: MySQL (Joins, Group By, CTEs, Window Functions, Subqueries)
Other: Jira, Automation Testing, Manual Testing, Software Development Fundamentals, Problem-Solving, Communication

INTERNSHIP

Data Analyst Intern – QSpiders, Noida Present

- Gained hands-on experience in Python, SQL, Advanced Excel, and Power BI; completed 4+ data analytics projects covering HR analytics, retail sales, and content trend analysis.
- Built 3+ interactive dashboards in Power BI and Excel using DAX and Power Query, reducing manual reporting time by ~30% and enabling faster, data-driven business decisions.

EDUCATION

CSJM University, Kanpur
Master of Science (M.Sc) | 74% 2025
Bachelor of Science (B.Sc) | 68% 2023

CERTIFICATIONS

Data Analyst – QSpiders, Noida

PROJECTS

HR Analytics Dashboard
Tools: Power BI, Power Query, DAX

- Imported and transformed HR data for 1,000+ employee records using Power Query; built interactive dashboards to analyze employee attrition, department-wise headcount, and performance.
- Used DAX measures to calculate KPIs and generate insights across 5+ departments; created slicers and filters for dynamic analysis of factors affecting employee retention.

Retail Sales Analysis using SQL
Tools: MySQL

- Imported 5,000+ sales records into MySQL and designed database tables; performed data exploration using JOINs, GROUP BY, HAVING, CTEs, Window Functions, and Subqueries.
- Generated insights on total sales, top 10 best-selling products, region-wise performance, and customer segmentation.

Sales Dashboard in Excel
Tools: Advanced Excel

- Cleaned and analyzed 2,000+ raw sales records using Advanced Excel, including Pivot Tables, VLOOKUP, XLOOKUP, and IF functions.
- Built an interactive dashboard with charts and slicers, improving sales and profit reporting turnaround by ~25%.

Netflix Data Analysis using Python
Tools: Python, Pandas, Matplotlib, Seaborn

- Performed data cleaning and preprocessing on 8,000+ titles using Pandas; analyzed trends in content type, genre, country, and release year.
- Visualized insights across 10+ genres and 50+ countries using Matplotlib and Seaborn to derive key findings on content distribution and popularity.

EXTRACURRICULAR ACTIVITIES

- Participated in science exhibitions and seminars during B.Sc, presenting findings on life science topics to peers and faculty.
- Assisted in laboratory research and data recording during M.Sc, building strong observational and analytical skills.
- Volunteered in university academic events, coordinating logistics and supporting fellow students.
